

Course No.	Course Name	L-T-P-Credits	Year of Introduction
CS307	DATA COMMUNICATION	3-0-0-3	2015
<b>Course Objectives</b> <ol style="list-style-type: none"><li>1. To introduce fundamental communication models.</li><li>2. To discuss various time domain and frequency domain concepts of data communication.</li><li>3. To introduce the concepts of encoding, multiplexing and spread spectrum.</li></ol>			
<b>Syllabus</b> <p>Data Transmission, Transmission Impairments, Channel Capacity, Transmission media, Wireless propagation, Signal encoding Techniques, Multiplexing, Digital data transmission techniques, Sampling theorem, Error detection and correction, Spread spectrum, Basic principles of switching.</p>			
<b>Expected Outcome</b> <p>Student is able to</p> <ol style="list-style-type: none"><li>1. Identify and list the various issues present in the design of a data communication system.</li><li>2. Apply the time domain and frequency domain concepts of signals in data communication.</li><li>3. Compare and select transmission media based on transmission impairments and channel capacity.</li><li>4. Select and use appropriate signal encoding techniques and multiplexing techniques for a given scenario.</li><li>5. Design suitable error detection and error correction algorithms to achieve error free data communication and explain different switching techniques.</li></ol>			
<b>Text Books</b> <ol style="list-style-type: none"><li>1. William Stallings, Data and Computer Communication 9/e, Pearson Education, Inc. [Chapters: 4, 5, 6, 7, 8, 9].</li><li>2. Forouzan B. A., Data Communications and Networking, 5/e, Tata McGraw Hill, 2013. [Chapters:3,4, 5, 6,7,8]</li><li>3. Schiller J., Mobile Communications, 2/e, Pearson Education, 2009. [Chapters:2,3]</li><li>4. Curt M. White, Fundamentals of Networking and Communication 7/e, Cengage learning. [Chapter 3,4,9,10]</li></ol>

COURSE PLAN			
Module	Contents	Hours	Sem. Exam Marks %
I	Data Transmission: Communication model Simplex, half duplex and full duplex transmission - Periodic Analog signals: Sine wave, phase, wavelength, time and frequency domain, bandwidth - Digital Signals; Digital data Transmission:- Analog & Digital data, Analog & Digital signals, Analog & Digital transmission - Transmission Impairments: Attenuation, Delay distortion, Noise - Channel capacity: Nyquist Bandwidth, Shannon's Capacity formula.	08	15%
II	Transmission media - Guided Transmission Media: Twisted pair, Coaxial cable, optical fiber, Wireless Transmission, Terrestrial microwave, Satellite microwave. Wireless Propagation: Ground wave propagation, Sky Wave propagation, LoS Propagation.	07	15%
FIRST INTERNAL EXAM			

III	Signal Encoding techniques - Digital Data Digital Signals: NRZ, Multilevel binary, Biphase - Digital Data Analog Signals : ASK, FSK, PSK - Analog Data Digital Signals: Sampling theorem, PCM, Delta Modulation - Analog Data Analog Signals: AM, FM, PM.	07	15%
IV	Multiplexing- Space Division Multiplexing-Frequency Division Multiplexing: Wave length Division Multiplexing - Time Division multiplexing: Characteristics, Digital Carrier system, SONET/SDH-Statistical time division multiplexing: Cable Modem - Code Division Multiplexing. Multiple Access- CDMA.	07	15%
<b>SECOND INTERNAL EXAM</b>			
V	Digital Data Communication Techniques - Asynchronous transmission, Synchronous transmission-Detecting and Correcting Errors-Types of Errors-Error Detection: Parity check, Cyclic Redundancy Check (CRC) - Error Control Error Correction: Forward Error Correction and Hamming Distance.	06	20%
VI	Spread Spectrum Techniques-Direct Sequence Spread Spectrum (DSSS), Frequency Hopping Spread Spectrum (FHSS). Basic principles of switching - Circuit Switched Networks, Structure of Circuit Switch - Packet Switching: Datagram Networks, Virtual Circuit Networks, Structure of packet switches.	07	20%

END SEMESTER EXAM			

**Question Paper Pattern**

1. There will be *five* parts in the question paper – A, B, C, D, E
2. Part A
  - a. Total marks : 12
  - b. Four questions each having 3 marks, uniformly covering modules I and II; All four questions have to be answered.
3. Part B
  - a. Total marks : 18
  - b. Three questions each having 9 marks, uniformly covering modules I and II; Two questions have to be answered. Each question can have a maximum of three subparts.
4. Part C
  - a. Total marks : 12
  - b. Four questions each having 3 marks, uniformly covering modules III and IV; All four questions have to be answered.
5. Part D
  - a. Total marks : 18
  - b. Three questions each having 9 marks, uniformly covering modules III and IV; Two questions have to be answered. Each question can have a maximum of three subparts
6. Part E
  - a. Total Marks: 40
  - b. Six questions each carrying 10 marks, uniformly covering modules V and VI; four questions have to be answered.
  - c. A question can have a maximum of three sub-parts.
7. There should be at least 60% analytical/numerical questions.
